WE ARE PROTEOR

At **PROTEOR USA**, we are in the constant pursuit of innovation with the best possible outcomes in mind. Keeping **#HumanFirst** as our mantra for over 100 years, we are committed to developing the most comprehensive product portfolio in the Orthotic & Prosthetic industry.

With the recent addition of the **Freedom Quattro™**, **Freedom Kinnex™ 2.0**, and numerous other prosthetic products to our existing product offerings including the **RUSH Foot® Collection** and the **ALLUX™ 2 MPK**, we welcome you to take a look at our expansive and extensive product catalog. Discover the exciting **PROTEOR USA** product line and our commitment to the pursuit of innovation.

Putting the **#HumanFirst**, we are excited to deliver an extensive, progressive product line that includes everything today's prosthetic wearer needs to **LIVE THE LIFE THEY LOVE.**

Human First

Fluidity, functionality, safety; a perfect composition.

The **Symphony** Knee is designed with a unique, 6-Bar polycentric structure that provides an extremely high level of stability during stance phase. Its innovative mechanical sensor, the p-MRS system, automatically detects gait status and controls the stability of the knee joint accordingly. Its hydraulic cylinder provides a smooth swing phase and works with the **Symphony's** adjustable stance flexion feature to enhance the patient's ambulatory experience and provide a comfortable, confident gait to the user.

- 6-Bar hydraulic knee.
- Adjustable stance flexion.
- Easy to access user adjustable manual lock.
- High level of stability due to geometric locking of the knee through toe off.
- Low build height.
- Unique hydraulic cylinder design allows easy flexion initiation.
- Convenient and user friendly 7.75in overall height.
- High maximum flexion angle of 170°.

matik

KNEES

The Matik was designed to provide an affordable 4-axis pneumatic knee for patients up to 275lbs.

Simply and effectively designed to provide high function with low maintenance. The easy swing of the pneumatic unit and the reduced weight of the knee give the patient a heightened sensation of fluidity and comfort. To support safety during swing phase and reduce the risk of a fall, the toe clearance height reaches 25mm, one of the industry's highest for this type of knee. **Matik** has both flexion and extension adjustments which address terminal impact and excessive heel height potentials.

- Pneumatic knee with extension spring.
- Secure 4-axis geometry.
- Safety and security through generous toe clearance during swing phase.
- Compact and lightweight (26,21oz / 743g).
- Adapted for patients up to 275lbs / 125kg.

TECHNICAL FEATURES

FREEDOM QUATTRO™ MICROPROCESSOR KNEE

More Intuitive. Less Intrusive.

Freedom QUATTRO Microprocessor Knee by PROTEOR is designed to give users the freedom to live their lives without interruption. With PROTEOR's innovative H.A.R.T. Control Technology, **Quattro** is the first MPK to provide a unique customized experience that captures user's distinctive gait patterns. Boasting 20 user modes, remote data capture, outcome measure reporting, and independent resistance for stairs/ramps and sitting, it challenges and drives the status quo for MPK's to the next level.

H.A.R.T. Control Technology: Finite customized real time response to gait needs.

User and Prosthetist App: Streamlined set up, monitoring, customization and cadence reporting are a touch away with the Clinician and Patient Apps.

No Service Intervals & Field Replaceable Kneepad Cover: Uninterrupted use.

20 Programmable Modes: Switching between activities has never been easier.

Manual Lock: Conveniently located inside the app or via the knee keypad.

Water Ingress Certified: IP67 tested for occasional submersion in water (submersible up to 1 meter for 30 minutes).

Shortest MPK Build Height for added versatility in foot selection.

Remote 3-month Data Capture: Users can choose to email their cadence data to their prosthetist for remote review.

ALLUXTM 2

KNEES

In pursuit of the world's safest knee.

ALLUXTM 2 is the first (and only) 4-Bar MPK that controls both stance, and swing phase. It's unique design boasts a dual safety system based on inherent stability factors and microprocessor control. **ALLUXTM 2** heightens safety and security while providing exceptional functionality to the user.

- PC and/or remote control no longer required. **ALLUXTM 2** is fully programmable via a Bluetooth enabled device.
- Using a Bluetooth enable device, the user can choose from 5 different modes as needed.
- New needle bearings used in the 4-Bar linkage provide smooth movement, increased durability, improved water resistance, and an industry-leading 180° flexion.
- It's polycentric design reduces chances of stumbling by increasing toe-clearance. In case of stumbling, the microprocessor immediately increases hydraulic resistance to prevent sudden buckling.
- Because of its polycentric design and inherent stability, **ALLUXTM 2** is also suitable for high or low activity users with long transfemoral, or knee disarticulation amputation levels.

TECHNICAL FEATURES

Item N°.	NE-Z41	NE-Z41SH

FREEDOM PLIÉ³ MICROPROCESSOR KNEE

KNEES

Stronger. Smarter. Submersible.

Stronger construction makes the new **Freedom Plie[®] 3** Microprocessor Controlled (MPC) Knee both submersible and more rugged than ever. Yet, it's still the fastest MPC knee, responding 10 to 20 times more rapidly than other MPC knees. With the most responsive stumble and fall protection, users can instinctively move at their own pace in any direction...even if it's taking small short steps or pivoting in confined spaces. And with a more streamlined, intuitive set up, the **Freedom Plie[®] 3** MPC Knee makes it even easier for prosthetists to help patients expand their freedom.

- Both weatherproof and FULLY SUBMERSIBLE.
- Lightweight design requires minimal energy.
- The most responsive stumble and fall protection.
- Move instinctively at users own pace in any direction, including taking short steps, walking backwards, or pivoting in confined spaces.

HYTREK

KNEES

A single axis knee with hydraulic regulation of stance phase and swing phase, equipped with a manual lock.

Strong high-end knee for dynamic transfemoral amputees. Navigate everyday life activities on all types of terrain; including slopes and stairs. Offers smooth ambulation and the ability to safely descend stairs step over step.

- Increased patient dynamics.
- Powerful hydraulic brake.
- Wide braking range.
- Optional manual lock.
- Extension assist.
- Maximum patient weight: 330lbs (150kg).

STANCE:

Adjustment of sensitivity for switching to braking mode.

RESISTANCE:

Adjustment of braking power.

LOCK:

Manual hydraulic lock switch.

FLEXION:

Adjustment of flexion angle.

EXTENSION:

Dynamic control of swing phase and terminal impact.

Human First

KNEES

High impact multisport knee.

The **EasyRide** knee was created in collaboration with adaptive athletes from around the world to ensure optimal performance capabilities for extreme, high impact, all-terrain sports such as surfing, snowboarding, skateboarding, cycling, skiing, and more. The **EasyRide** lets you get back to the activities you LOVE without limitations.

Durability and Safety.

Thanks to the technical capabilities and setting possibilities of the FOX® shock absorber, the **EasyRide** smoothly reproduces the natural motion of the knee and ensures smooth energy return, closely mimicking the sensations experienced in extreme sports. The **EasyRide** enables participation in high impact sports and cycling thanks to the lightweight, yet sturdy design. Constructed of aeronautical-grade aluminum alloy with a custom hardening treatment, the **EasyRide** withstands even the most extreme conditions such as saltwater and cold temperatures.

Adaptability.

Depending on the type of sport the user is participating in; the patient is able to customize the knee for optimal function. Sliding sports require knee flexion. In the sliding sport alignment position, the **EasyRide** adjusts to 12° pre-flexion / 60° max. For cycling, the knee has to allow both a good load transfer to the pedal and enough flexion for pedaling. In biking position **EasyRide** will be adjusted with 0° pre-flexion / 130° flexion max.

TECHNICAL FEATURES

Item N°	1P650
Weight	1264g

Comfort and Freedom

The **Gery** foot aims to provide lower level K1-K2 users with the freedom they deserve. It greatly assists your patient's ability to ambulate with its lightweight design and accommodates heel heights ranging from .2" to .8" (5mm to 20mm). The **Gery** is easily cleaned with water and resistant to dirt thanks to its closed cell EVA foam.

- Engineered specifically for the low-level K1-K2, AK & BK population.
- Rated up to 150kg / 330lbs.
- Re-engineered with a new core.
- 1 Year warranty.
- 100 % Waterproof.
- Comfort thanks to its design that reduces residual limb pain.
- Lightweight thanks to its EVA structure ≈ 30% lighter than a SACH foot!
- Easy step completion thanks to its profiled core.
- Malleolar clip included.

TECHNICAL FEATURES

Weight	395g
Build Height	3.22" (82mm)

DynaStep

FEET

Comfort and Dynamics

Aided by the shape of its carbon strut, the **DynaStep** ensures energy savings and comfort while providing the patient with dynamics suitable to a K2 activity level; its split toe design allows inversion and eversion while navigating uneven terrain.

- Appropriate for transtibial and transfemoral amputees.
- Foam of the foot is molded on the carbon strut.
- Comes with its malleolar clip to help the set up of the foot shell.

TECHNICAL FEATURES

Item N°.	Side	Size (cm)	Max. Patient Weight

FEET

Shocking Absorption. Effortless Momentum.

The Freedom **ShockWave™** vertical shock foot incorporates a unique Spherical Shock Unit (SSU) that works in harmony with the existing features of the classic Freedom foot design and proprietary EnduraCore® technology. The multi-functional Spherical Shock Unit (SSU) provides both vertical shock relief and axial rotation offering K3/K4 ambulators a shockingly smooth experience during daily life and high impact activities; its light weight and slim profile provides an easy fit and finish.

- Water-resistant.
- Ultimate shock absorption at heel strike eases stress on the residual limb for a more natural gait.
- Axial rotation of +/- 15° reduces socket pressure and allows for quick pivoting in a seamless motion.
- Full-length heel initiates plantar flexion at heel strike for better ground compliance and maximum energy return.
- Bolt-less design eliminates dead spots and weak structural areas resulting in a lighter and more reliable foot.
- Split keel and heel delivers added motion improving stability, comfort, and confidence on various terrains.
- EnduraCore technology provides ideal strength, flexibility, durability, and high energy return.
- Rated to 325lbs, 36-month warranty.

Sandal-toe available for sizes 23-28cm.

FEET

FREEDOM Sierra®

Ultimate Flexibility for a Smoother Gait

The **Freedom Sierra®** prosthetic foot incorporates a long carbon fiber spring to provide users a smooth gait over a broad spectrum of activities. The split toe design provides excellent inversion-eversion so that amputees can walk with confidence on uneven terrain. A full-length heel enables foot flat early in the gait cycle, providing a compliant foot with a stable base of support. The result is a product that allows amputees to walk comfortably with confidence.

- Water-resistant.
- Angle-top design increases the length of the carbon fiber spring, providing a smoother gait and ultimate flexibility.
- Split keel delivers excellent inversion-eversion.
- Full-length heel enables foot flat early in the gait cycle, providing a stable base of support and exceptionally smooth gait.
- Rated up to 365lbs, 36-month warranty.

Sandal-toe available
for sizes 22-28cm.

FREEDOM

Pacifica®

FREEDOM

Pacifica® LP

Because Height Matters

The **Freedom Pacifica®** prosthetic foot is ideal for users with long residual limbs, due to its low profile design. In contrast with competing low profile foot products, which may feel stiff and uncomfortable, **Freedom Pacifica®** users experience flexibility and energy return allowing them to walk farther, faster, longer. The lightweight and durable design requires less energy expenditure so that amputees are comfortable on their feet for longer periods of time. The pyramid lies within the foot shell, simplifying the cosmetic finishing process. A low build height also provides room for additional componentry, such as a rotator or shock absorber which can provide added comfort.

- Water-resistant.
- Choose between the **Pacifica®** (FS2) and **Pacifica® LP** (FS4), each perfect for amputees with long residual limbs or those needing more build space.
- LP design requires as little as 2" of clearance.
- Lightweight and durable.
- Rated to 365lbs, 36-month warranty.

Sandal-toe available for sizes 22-28cm.

TECHNICAL FEATURES

Time Tested Stability and Dynamics

The **Freedom Highlander**® prosthetic foot provides active patients with long residual limbs an efficient and smooth gait, with excellent energy return. A split toe provides excellent inversion-eversion, allowing users to walk and run with confidence on uneven terrain. The **Freedom Highlander**® MAX can be ordered to accommodate users up to 500lbs.** As a result, amputees once limited to lower functioning products can now enjoy the benefits provided by a premium energy storage and return device so they can walk farther, faster, longer.

- Water-resistant.
- Engineered for active amputees with long residual limbs.
- Split keel provides excellent inversion-eversion.
- Offers ideal blend of stability and action, often preferred by transfemoral amputees.
- Can be designed for amputees weighing up to 500lbs with the **Freedom Highlander**® MAX option.
- Rated to 365lbs, 36-month warranty.

FREEDOM

DynAdapt™

Fit, Finish and Roll

The **Freedom DynAdapt™** prosthetic foot is a slim profile, carbon fiber foot system with a slender, anatomic design for easy fit and finish. Its multi-axial function provides maximum comfort and the uninterrupted strands of carbon fiber in the full-length heel provide patients with effortless rollover and a more natural gait.

- Water-resistant.
- Split toe/heel design provides excellent inversion-eversion for patient stability on uneven terrains.
- Weighing in at 435g, the **Freedom DynAdapt™** foot is more comfortable and requires less exertion.
- A full length, unbolted sole plate ensures seamless stance phase roll-over for superior comfort.
- Split keel and heel design increase ground compliance and improve stability, thus allowing patients to walk with confidence on uneven surfaces or terrain.
- EnduraCore™ technology provides more durable and energy efficient performance.
- Rated to 365lbs, 36-month warranty.

Sandal-toe available for sizes 22-28cm.

FREEDOM Agilix™

Maximum Shock Value

The **Freedom Agilix™** is a multi-axial, shock absorbing flexible foot system designed to manage loading impacts, reduce socket shear forces and improve comfort while walking on any terrain. The ultra-lightweight design offers K3 ambulators shockingly comfortable performance at a value like no other.

- Water-resistant.
- Vertical shock absorption and carbon fiber flexibility optimized for low to moderate impact K3 ambulators; reduces socket shear forces and improves overall comfort.
- Multi-axial function increases ground compliance and stability; Streamlined, split-toe design results in improved long-term durability, saving time and money.
- Full length dynamic heel attached at the toe ensures a seamless roll-over, for superior comfort and a more symmetrical gait.
- Lower profile and lighter weight than the competitive alternative, allowing users to do more and feel less tired at the end of the day.
- Rated to 365lbs, 36-month warranty.

FEET

Smaller. Slimmer. Lighter.

The latest innovation in the world's leading fiberglass **RUSH Foot®** collection, the **RUSH ROGUE® 2**, is here!

The **RUSH ROGUE® 2** is unmatched on every level providing an optimal vertical shock experience, axial rotation for improved comfort, predictable performance, ultimate fiberglass strength, and flexibility for daily life and high impact activities.

- 32% smaller in volume redesigned Vertical Shock Rotator provides a slimmer profile (6.9in3)
- 10.5% reduction in overall product weight reduces fatigue during activities (-116g)
- 240% increase in vertical shock absorption reduces impact forces on the residual limb (<4.25mm)
- 88% more axial rotation reduces socket pressure while increasing comfort (+/-15° each direction)
- Extreme reliability for extended use in daily life and high impact activities
- Waterproof (fresh or saltwater)

THE ORIGINAL RUSH ROGUE IS NO LONGER AVAILABLE

FEET

Virtually Indestructible

The **RUSH Chopart®** is specifically designed for people with Chopart amputations as well as lisfranc, pirogoff, boyd and partial foot prostheses. A dynamic design, providing increased reliability and eliminating the breakage commonly seen with carbon Chopart plates. The unique glass composite is engineered to be more flexible and durable than any other Chopart available today.

- Highly-dynamic.
- Durable.
- Smooth roll-over.
- Waterproof (fresh or salt water).

FEET

Simplistic, Effective, Efficient

Finally, an unprecedented elevated vacuum system that seamlessly integrates effective vacuum with the same rugged simplicity of all the RUSH Foot® designs. The **RUSH Foot® EVAQ8 Collection** is the easy solution to providing maximum vacuum efficiency in just a few quick steps. No batteries or complicated, mechanical pump required.

- Simple, integrated design.
- Stabilizes volume, increases linkage, and heightens proprioception through elevated vacuum suspension.
- All-terrain, fully-submersible .
- Requires minimal maintenance.
- The **RUSH Foot® EVAQ8 Collection** is available in the **RAMPAGE**, **HiPro**, **ROGUE 2**, and **RAMPAGE LP** models.

FEET

Incomparable Grip. No Foot Shell Required.

The **RUSH Foot® H2O Collection** is the ideal foot for your shower leg or various, non-invasive water sport activities. Available in the tried-and-true RUSH Foot® **HiPro**, **RAMPAGE**, **RAMPAGE LP** and **ROGUE 2** models and featuring an integrated Vibram® sole and custom molded rubber toe wrap. The **RUSH Foot® H2O Collection** of feet offers the same great durability and comfort of all the other RUSH feet, but now adds superior traction on slick surfaces. From the shower to the pool, you won't find a foot that provides this amount of grip and added confidence on slippery surfaces.

FREEDOM Kinterra™ 2.0 FOOT/ANKLE SYSTEM

FEET

Extraordinarily Normal

The **Freedom Kinterra™ 2.0** Foot/Ankle System combines hydraulics and carbon fiber technology to provide low to moderate ambulators an exceptionally normal walking gait- regardless of terrain or walking speed. This results in rock solid stability and the confidence for users to choose a new path.

- Independent above the foot shell DF/PF adjustability.
- 12° Range of Motion: (2° dorsi, 10° plantar) increased ankle movement for a more natural gait.
- Optional Sandal-Toe: Available in sizes 22-28cm.
- A full length, unbolted sole plate ensures seamless stance phase roll-over for superior comfort.

Sandal-toe available
for sizes 22-28cm.

FEET

Designed for Real Life.

The **Freedom Kinnex™ 2.0** integrates the world's fastest responding microprocessor ankle/foot technology and carbon fiber to provide low to moderate impact K3 ambulators the stability they expect — instantly. Unmatched ground compliance, improved comfort, and automated heel height adjustments keep users firmly grounded and connected, wet or dry. Designed for low to moderate K3 level ambulators that require unsurpassed ground compliance for everyday activities.

- IP67 Water-resistant.
- Sophisticated microprocessor controlled resistance that helps optimize stability whenever changes in terrain or cadence occurs.
- Accommodates heel heights from 0-2" and allows user to program up to 100 shoes.
- 30° of microprocessor-controlled motion: 20° plantar flexion / 10° dorsi flexion allows the ankle and foot to be ideally positioned in relation to the ground.
- Kinnex GaitLab App for prosthetist use to set up the patient using a smart phone device.
- Kinnex Patient App for the user to monitor battery status, make heel adjustments, select shoes and fine tune performance and comfort settings.
- Rated to 275lbs, 36-month warranty.

CONNECTORS

COMPONENTS

Connectors for PROTEOR knees

These connectors are necessary for the assembly of PROTEOR knees: 1M01 - 1M01-HD - 1M10 - 1M10-HD - 1M102 - 1M102-HD - 1M102V - 1M102V-HD - 1M112 - 1M113

This specific connection system allows you to select the most appropriate linking piece between the knee and the socket. The simplified shape of the upper part of the knee can receive the proximal linking piece using a M8 screw. The knees listed above must be ordered together with one of the following connectors. All these connectors provide a $\pm 15^\circ$ socket rotation.

	Item N°	Description	Max patient weight	Material	Weight	Connection	Total Height	Build Height	Knee

Keasy

KEASY has established itself over the years as the unique prefabricated cone allowing to manufacture rapidly quality finished thermoformed liners.

A unique prefabricated cone, the KEASY has established itself due to the offered ability to rapidly create quality, finished thermoformed liners.

No welding, no gluing, and seamless, the KEASY minimizes allergenic risks while providing comfort. Fabrication and finishing time are shortened with easy thermoforming, cutting and sanding abilities. Changes in limb volume can be accommodated by gluing extra material to the outer surface. Closed cell structure keeps perspiration and cleaning products from penetrating the material for easy cleaning.

SEALING SLEEVES

SOCKETS

Sealing ring.

This silicone sealing ring has to be bonded onto the liner of lower or upper limb amputees.

By creating vacuum between the socket and the liner, it provides the prosthesis suspension through depressurization for patients without locking device. Available in 4 sizes (from 2 to 5) it is suitable for any case.

TECHNICAL FEATURES

Item N°.	Size	Ø Distal	Adhesive included
1S950-02	2	16 to 22 cm	yes
1S950-03	3	20 to 38 cm	yes
1S950-04	4	30 to 48 cm	yes

Locks for distal attachment.

	Use	Material	Weight	Tools & Accessories		Item N°.
	Locking Kit with Smooth Pin, Small Cup and Adapter for 1K90 This kit with push button and smooth pin is fitted with a device that locks the pin, allowing accurate positioning. Thanks to its small cup (Ø 57mm), it is particularly appropriate for residual limbs with low volume, such as transtibial ones. It is designed for assembly with 1K90 cup which is not included in the kit.	Plastics	100g	1S129: Tools for Lamination / Thermoforming 1S112: Centering Tool		1S137-1
	Locking Kit with Smooth Pin and Vertical Pulling This locking kit with pin is operated by vertical tab pulling. Control of unlocking can be displaced through a handle fitted on the side of the socket. 2 pins are supplied: a smooth pin that provides fine adjustment of the liner, and a smooth pin with notched end allowing the patient to know if the pin is well engaged and providing accurate adjustment. Ø 45mm cup.	Plastics + Aluminum	85g	1S141: Tools for Lamination / Thermoforming 1S129: Tool for Lamination / Thermoforming, used with 1S142 1S112: Centering Tool 1S142: Adapting Kit for assembly with 1K90 cup 1X110: Handle for displaced control of unlocking		1S140
	Locking Kit with Notched Pin and Rack Adjustment 1S145 locking kit provides very fine adjustment thanks to its rack system which avoids any slack in the bottom of the socket. It comes with a lamination prong for the upper connection and the tools needed for lamination. The lower connection is provided by screwing a threaded pyramid insert (1K182) or a threaded Receiver insert (1K183).	Aluminum + Stainless steel	125g	1K182: Threaded Pyramid insert 1K183: Threaded Receiver insert		1S145

FABRICS

MATERIALS

Terry cloth

- Particularly suitable for making covers.
- Ideal for lining.
- Stretchable in both directions.
- Easy to clean, washable up to 40°.

Self-adhesive suede fabric

- It is recommended for inside or outside lining of orthosis.
- Very comfortable contact, soft and flexible to the touch.
- Fabric with a powerful adhesive.
- Good resistance to aging.

Self-adhesive fabric

- Ideal for inside or outside lining of orthosis.
- Very comfortable and soft to the touch.
- Fabric with a powerful adhesive.

Self-adhesive carbon imitation

- This vinyl is particularly recommended for the lining of orthosis.
- It allows the covering of any material in order to get a «carbon-fiber» appearance.
- Resistant and easy to apply (with a heat gun).
- Adhesive side for immediate bond, optimal after 24h.

Padding felt

- Particularly suitable for making covers.
- Extensibility (bi stretch).
- Excellent mechanical strength.
- Easy to clean, washable at 40°C.
- Dries faster than an ordinary fabric.
