Redefining the Ankle Experience

Kinterra just makes things a lot smoother. Getting in an out of a chair, couch, or stool, the fact that you have an ankle allows more natural, smooth movement. My balance is better. It allows me to go straight up and down stairs. It's a whole lot easier, a lot more comfortable. It's been lifechanging."

Jeff T. Retired RV Sales

"I've been a double amputee since 2013, believe me, nothing is like this foot. I've had maybe 5 feet, and Kinterra is unbelievable, it **actually** feels like you have a leg. When you're walking, you're sitting down, the toes are flat. I wasn't tired, it felt like I was walking on water. Feels a lot lighter, very comfortable. When I stand still, I balance very easy. It's like a part of you and you're not scared"

Francisco M. | Retired Car Salesman

This is just like having two regular feet, **I forget** I have a prosthesis on. I took two steps and could tell a difference. Kinterra went smoothly and quickly step over step on stairs, I usually step up one foot at a time. It was so easy going up and down the hills I didn't even notice there was unevenness."

Milissa B. Specifications Coordinator

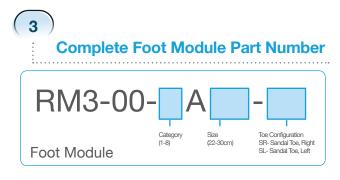

I've tried many different feet, and the Kinterra is the best foot *I have ever worn.* The other ones now I feel like I'm walking with a brick. Kinterra feels like my real ankle feels. I would recommend this foot to anybody, it's just easier to walk. I could sit in this position for a long period of time, it's just comfortable. I'll never wear another foot other than this Kinterra. This is going to be a lifechanging thing for me, this foot. It's going to change my life."

Stephen J. General Contracting Business

KINTERRA

REDEFINING THE ANKLE EXPERIENCE

The time-tested hydraulic ankle that continues to raise the bar for quality, stability, range of motion, and comfort.

KINTERRA®

Not just a 3.0

Redefining the Ankle Experience

Experience the highest level of satisfaction with the redesigned Kinterra hydraulic ankle. Thoughtfully designed to meet more daily needs and to exceed all performance expectations. Redefining movement for life.

THE KINTERRA DIFFERENCE

Consistent performance

Improved valve design for larger range of PF/DF resistance adjustments, smoother hydraulic movement, and temperature compensation for consistent performance

Lasting reliability

Hinge pin diameter increased for improved fatigue resistance

20%

increase in user weight rating

Industry-leading weight rating supporting users up to **330 lbs** without increasing product weight

expansion of ROM

Energy return and socket comfort without sacrificing stability

Increased compatibility

Redesigned pyramid and collar shape for a decreased build height and increased reliability

Clinically optimal hydraulic ankle ROM for energy return and terrain adaptation during ambulation, and improved socket comfort during sitting, without sacrificing stability

17° hydraulic ankle articulation 15° of plantarflexion and 2° of dorsiflexion allow the foot to reach and maintain footflat across differing terrains and improved socket comfort while sitting

330lb user weight rating Tested to over 3 million cycles at 330lbs/150kg load

Change shoes without adjustment Accommodates moderate changes in heel height without adjustment

Submersible in fresh water up to 1m for 30mins

Improved dorsiflexion assist spring Returns the ankle to 2°DF when unweighted, decreasing risk of toe catching during ambulation

Seamless movement

Redesigned EnduraCore® footplate for energy return and a smooth rollover. A split heel and heel provide mediolateral stability and terrain adaptation
